🧠 SKILLS

Programming Languages

Python
Java
C/C++

Database Management

SQL
MySQL
MongoDB Basics

Machine Learning and Data Analysis

Supervised and Unsupervised Learning
Reinforcement Learning

Libraries and framework

Scikit-learn, Tensorflow, SkFuzzy, Pandas, NumPy, Tkinter, Matplotlib

Soft skills

Problem Solving, Leadership, Communication, Multi-tasking, Content Writing

👤 PROFILE

Highly motivated engineering student adapt in developing machine learning solutions and problem-solving skills. Eager to apply academic knowledge and skills in a professional setting. Talented Team Leader experienced and dedicated to enhancing employee satisfaction and business success. Diplomatic and friendly with proven commitment to employee training. Hardworking team player bringing necessary experience and knowledge to tackle any operational demand.

🏠 WORK HISTORY

UnderGraduate Research Assistant

Sastra University (ASK)

Thanjavur, India

- Maintained open lines of communication with project leads and team members for effective collaboration on common goals.
- Collaborated with multidisciplinary teams to develop innovative research methodologies and strategies.
- Enhanced research quality by meticulously collecting and analyzing data from various sources.
- Conducted literature reviews to support hypothesis development and identify gaps in existing knowledge.
- Developed research protocols and procedures to produce accurate results.

KURUKSASTRA DAKSH (QUALITY MANAGEMENT)

SENIOR MEMBER (EVENT ORGANISER)

THANJAVUR

- Spearheaded the quality management initiatives at Daksh, ensuring adherence to industry standards and continuous improvement processes. Implemented robust quality control measures, streamlined workflows, and facilitated training programs to enhance product and service excellence. This resulted in higher customer satisfaction and operational efficiency.
- Helped in Organizing a series of workshops and hackathons for Annual Tech fest
- Coordinated schedules and timelines for events.
- Conducted thorough post-event evaluations to assess strengths and areas for improvement, incorporating findings into future planning processes.

KURUKSASTRA (TEAM INFRA AND LOGISTICS)

TEAM LEAD MEMBER

THANJAVUR

- Led the infrastructure and logistics team for Kuruksastra, managing the planning and execution of logistical operations and infrastructure setup

EDUCATION

Computer Science and Engineering (Artificial Intelligence and Data Science)

SASTRA UNIVERSITY

2021 – 2025 | Thanjavur, India

Grade-76%

HSC-12th Grade

Sri Sankara Matriculation Hr.Sec.
School

2021 | Thiruvavur, India

Grade-97%

Graduated as Rank Holder(School
Level-1st)

SSLC-10th Grade

Sri Sankara Matriculation
Hr.Sec.School

2019 | Thiruvavur, India

Grade-98%

Graduated as Rank Holder (District
Level)

LANGUAGES

Tamil	
English	
Malayalam	
Telugu	

CERTIFICATES

Introduction to Data Analysis using Microsoft Excel

COURSERA

Ethical Hacking Course

INTERNSHALA

Supervised Machine Learning: Regression and Classification

DeepLearning.AI & Stanford University

Unsupervised Learning, Recommenders, Reinforcement Learning

DeepLearning.AI & Stanford University

Advanced Learning Algorithms

DeepLearning.AI & Stanford University

- Coordinated with cross-functional teams to ensure seamless event execution, optimized resource allocation, and maintained high standards of operational efficiency
- This leadership role contributed to the successful delivery of large-scale projects and events

PROJECTS

Optimizing Predictive Maintenance with Fuzzy Logic and Machine Learning

Developed Own Research and made a Research Paper in Machine Learning

Optimizing Predictive Maintenance with Fuzzy Logic and Machine Learning:

Optimizing Predictive Maintenance by Integrated Fuzzy Machine Learning Algorithms" involves developing a system that utilizes fuzzy logic and machine learning to predict and optimize maintenance schedules for machinery and equipment. The objective is to reduce the length of time with no activity and costs associated with upkeep, all the while enhancing the general efficiency and reliability of the equipment.

-Research Project at SASTRA UNIVERSITY -yet to be published in Journal

Optimized Solar Energy Prediction Using Genetic ALgorithm in Artificial Intelligence,

Developed a robust predictive model for solar energy output utilizing genetic algorithms to enhance feature selection and optimize machine learning parameters. Achieved significant accuracy improvements in forecasting by integrating historical weather data and leveraging advanced AI techniques, contributing to more efficient energy management and resource allocation. - **Project at SASTRA UNIVERSITY**

Improved prostate cancer diagnosis using a modified ResNet50-based deep learning architecture

Developed an enhanced diagnostic model for prostate cancer by modifying the ResNet50 deep learning architecture. This approach increased the accuracy of cancer detection and classification through advanced image processing techniques, leading to more reliable diagnoses and better patient outcomes.

- Project at SASTRA UNIVERSITY

Adaptive Energy Optimization in Smart Buildings Using Fuzzy Logic and Machine Learning:

Designed an adaptive energy management system for smart buildings, integrating fuzzy logic with machine learning algorithms. This system dynamically adjusts energy consumption based on real-time data and environmental conditions, leading to significant energy savings, improved efficiency, and enhanced occupant comfort.

- Research Project at SASTRA UNIVERSITY -yet to be published in Journal
